

Quality policy

Connolly Environmental specialises in providing quality, reliable services covering environmental investigation, management and remediation of contaminated soil and groundwater.

Connolly Environmental's objective is to satisfy our clients through consistent high quality services that meet client and regulatory requirements. Connolly Environmental is committed to ISO 9001:2015 to continuously improve the services provided.

The Connolly Environmental Quality Management System ensures the continued success of the business and the satisfaction of clients and staff. This system is communicated to all employees and is used to maintain control, ensure consistency and encourage continual improvement.

Regular review of our Quality Management System ensures our commitment to quality is achieved.

Mark Connolly

Manager
